HOW DOES IT WORK?

Localized wraps are one of the best and **most effective heat treatments.**

The localized increase in temperature, thanks to the heat that penetrates the adipose tissue, promotes vasodilation and therefore also a correct lymphatic circulation, **facilitating the drainage of liquids and toxins.**

Furthermore, thanks to a particular wavelength, the machinery gives off heat only when it reaches the adipose tissue, **favoring the increase in metabolism and basal calorie consumption.**

YOU CAN USE IT AS

A WAY TO LOSE WEIGHT
Increase your metabolism leading to weight loss

ANTICELLULITE
It improves blood and lymphatic circulation

SLIMMING
Localized loss of cm

LYMPH-DRAINING
Remarkable draining function
